

**Attendance for tutorial is compulsory and
you need to register to attend.**

If you cannot attend for a reasonable condition, provide your tutor, with a valid document from your doctor or employer, etc.

- **Assignment Submissions (30%)**
 - Assignment 1: (15%)
 - Assignment 2: (15%)
- **Final Exam (60%)**
- **Attendance and contribution to discussion in tutorials (10%)**

Assignment Guidelines

- **Undertaken in Group of 4 students**
- **Same group for assignment 1 and 2**

We use **civil engineering examples** in the lecture notes and tutorial.
However **you don't need civil engineering knowledge** to do the assignment
or pass the exams

Assignment 1 presentation (Tutorial 4)

- The purpose is to provide an opportunity for students to briefly present their assignment in the class and generate some useful discussions.
- The presentation has no impact on the assignment marks.

Submit Two Soft copies on LMS:

1-via LMS Assignment Submission Tool

2-via LMS Turnitin

by one of the group members.

Please rename the title of your submission to reflect your tutorial and group number (e.g. Tutorial06_Group03).

Peer review assessment:

- You should conduct Peer review assessment on LMS before the assignment submission deadline via PRAZE link on LMS

Your individual mark depends on your group mark and the assessment outcome of your peers.

Your individual mark will be released at the **end of semester**.

Submissions Deadline

If you are not able to submit your assignment before the deadline for a reasonable condition, you should ask for an extension **before the deadline**

In this case you should provide the subject coordinator (Dr Zhang) with the valid document and request for an extension

Consultation

Thurs 2pm-3pm, Engineering D207

Take the lift in Block C to 2nd floor

Visit FAQ on LMS for:

- General information
- Information about Assignments, Final exam

Now Let's Form the Groups...

4 students for each group

Remember your Group Name (e.g. Tutorial06_Group03)
